

Customer experience journey map

Use this framework to better understand customer needs, motivations, and obstacles by illustrating a key scenario or process from start to finish. When possible, use this map to document and summarize interviews and observations with real people rather than relying on your hunches or assumptions.

Document an existing experience

Narrow your focus to a specific scenario or process within an existing product or service. In the **Steps** row, document the step-by-step process someone typically experiences, then add detail to each of the other rows.

As you add steps to the experience, move each these "Five Es" the left or right depending on the scenario you are documenting.

SCENARIO Browsing, booking, attending, and rating a local city tour	Entice How does someone initially become aware of this process?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
Steps What does the person (or group) typically experience?	Customers can predict the prices of crude oil price history can be verified by customers using our customer when to buy and self including the charts, by the customer subset of the subset of the customer subset of the subset of t	Register or Login An examination of the application's various features can be carried out by the customer An examination of the application's various features can be carried out by the customer An application tour is visible to our customers to create a new account or log in if they already have one	Search date facility Description In order to see the price, the customer searches for the dates for which they want to see it To analyze prize to see the price, the customer to view the customer to view the they want to see it Selects date facility To analyze prize to so so like the customer to view the customer to view the price reasons	Logout When the customer finishes providing feedback, he or she logs out of the app	News notification The customer could receive daily information about crude oil automatically
Interactions What interactions do they have at each step along the way? People: Who do they see or talk to? Places: Where are they? Things: What digital touchpoints or physical objects would they use?	Dates of future History of prices News	Sign-Up Section Application dishboard	Price detail section Price history section	Log out section Feedback section	Mait SMS
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me" or "Help me avoid")	Makes it possible for customers to predict the future price of crude oil The customer can determine when to sell or buy crude oil	The customer can determine when to sell or buy crude oil sell or buy crude oil	To select the date To know the prices	Application improvements are Satisfaction of made possible by customer feedback	Speed up the login process for convenience applications
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Profit from crude oil predictions	With an account, you will be able to access all features of the application	Ability to find out about the delay of selected flights	An application's performance can be improved with feedback	Enhances customer convenience
